PROFESSIONAL SUMMARY

AI Software Engineer with 2+ years of experience at Amdocs building production Generative AI applications and Python backend services. Specialize in Retrieval-Augmented Generation (RAG), agentic LLM workflows with LangGraph and LangChain, Azure OpenAI, vector search with ChromaDB, and Flask REST APIs. Delivered enterprise solutions across SDLC automation, defect intelligence, and third-party software vulnerability assessment; strong CS fundamentals with 500+ Data Structures and Algorithms problems solved.

TECHNICAL SKILLS

Generative AI: LLM Application Development, Retrieval-Augmented Generation (RAG), Agentic AI, Prompt Engineering, Embeddings, Semantic Search, Model Context Protocol (MCP), Machine Learning, Deep Learning

AI Frameworks & Cloud: LangChain, LangGraph, Azure OpenAI

Languages: Python, SQL, C++

Backend: Flask, REST API Design, API Integration, Workflow Automation, Monitoring & Telemetry

Databases: MongoDB, Oracle, MySQL, ChromaDB (Vector Database)

Tools & Platforms: Cursor, Git, GitHub, GitLab, JIRA, ClearCase, Postman, Linux, VS Code

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

AI Software Engineer | Amdocs

Aug 2024 - Present | Gurgaon, India

- Build Python backend services for an enterprise AI-driven SDLC platform that automates requirement analysis, solution architecture, development planning, and SDLC document generation, reducing manual documentation effort for engineering teams.
- Designed multi-stage LangGraph agentic workflows and retrieval pipelines that combine enterprise documentation, SME knowledge, and developer tooling to auto-generate HLD, LLD, DDD, SSRS, UT, and HLT artifacts.
- Developed Flask REST APIs integrating LLM inference, vector search, MongoDB, and Oracle data sources, with monitoring, telemetry, auditing, and user-activity tracking for reliable production operation.
- Integrated JIRA, GitLab, ClearCase, and MCP services into AI workflows, enabling end-to-end automation across existing enterprise engineering toolchains.
- Own development in Linux environments using Git, Postman, and code reviews for debugging, API validation, and collaborative delivery with cross-functional teams.

Project Trainee (Software Engineering Intern) | Amdocs

Feb 2024 - May 2024 | Gurgaon, India

- Contributed to enterprise Generative AI use cases spanning chatbot development, Python backend services, and knowledge-retrieval systems; recognized in the Amdocs GenAI Hackathon.

KEY PROJECTS

GenAI Defect Search & Analysis Assistant - Python, Azure OpenAI, RAG, ChromaDB, LangGraph, MongoDB, Flask

- Built a RAG pipeline that embeds enterprise defect records in ChromaDB and retrieves them by cosine similarity, replacing keyword-only search with context-aware answers that include reasoning and resolution guidance.

GenAI Effort Estimation for Third-Party (3P) Software Vulnerabilities - Python, Azure OpenAI, RAG, ChromaDB, LangChain, MongoDB, Flask

- Automated a manual tracking process by identifying vulnerable third-party components from natural-language queries and generating contextual remediation-effort estimates using retrieval plus LLM reasoning.

EDUCATION

Master of Computer Applications (MCA) | Jawaharlal Nehru University, New Delhi | CGPA: 7.4/9

2022 - 2024

Bachelor of Science (Mathematics) | Govt. College, Hisar | 79%, POSE Scholar

2018 - 2021

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Prompt Engineering; Generative AI for Beginners; Microsoft Azure Active Directory; HackerRank Problem Solving (Basic); HackerRank SQL (Basic)

Achievements: Rank 1 - Chess, Amdocs Optima Sports Fest 2026; Gold, Silver, and Bronze medalist at District, State, and Inter-College Chess Championships; 500+ DSA problems solved on LeetCode and GeeksforGeeks
